

MOUNT MORGAN MINE

Vision Surveys has provided a range of services to Carbine Resources. Vision traced through and digitised historical mine plans dating from the 1890s to create an up-to-date 3D models of the mine site.

UAV flights were conducted throughout the site. The combination of both the flight data and the newly digitised models enabled the creation of an up to date model to determine volumes for the mine.

We have installed survey control over the site and carried out preliminary haul road and drainage designs.

PROJECT TYPE: Mine Surveying

LOCATION: Mount Morgan - Central Queensland

STATUS: Preliminary Phase and Ongoing

SERVICES: UAV, 3D Modelling, Civil Engineering and Survey

CLIENT: Carbine Resources

CARBINE RESOURCES

Experts in: Project Coordination • Land Surveying • Town Planning • 3D Spatial • Civil & Mining Infrastructure
