

UNMANNED AERIAL VEHICLE (UAV)

Vision Surveys provides the latest technology enabling efficient surveying using drones to survey large parcels of area for multiple purposes. The benefits of drone surveying removes a large portion of tradition field survey for general surface level pick up and removes risk for surveyors working near machinery and plant equipment.

We have a team of UAV Remote Pilots who are licensed with CASA. Our company is also registered with CASA with an approved Operation Manual, Flight Manual and Maintenance Manual.

SERVICE LINE: UAV Surveying, Aerial Photography

SERVICE EXAMPLES: Large scale contour Surveys for road construction, Digital Elevation Models (3D Modeling), Orthomosaic imagery, Up to date aerial imagery, Large scale quarry and Mine Surveys for volumes, Civil Earthworks and pipelines.

PROJECT EXAMPLES:

- Hamilton Island Quarry;
- Bunnings Rockhampton Survey;
- Mt Morgan Haul Road Survey;
- Biloela railway contour survey;
- Scenic Highway Roadworks Survey;
- Phoenix Power Recyclers, and
- Quarry Volume Survey
